About the Quality of Nationality Index

Kälin and Kochenov's Quality of Nationality Index (QNI) ranks the objective value of the world's nationalities as legal statuses of attachment to states. Looking beyond simple visa-free tourist or business travel rights, the QNI takes several other crucial factors into account to demonstrate that the world's nationalities are not equal, and that some nationalities afford a better legal status than others to develop one's talents while living a rewarding life. The emerging picture reveals that while some nationalities are welcomed bundles of rights, others – the majority, in fact – are clear liabilities for their holders.

The QNI ranks *nationalities* rather than states per se. It takes into account the increase in world migration flows and the lack of correlation between the nationalities held by a growing number of active individuals and the countries in which their businesses are established and their lives are lived. Such considerations fundamentally distinguish the QNI from the majority of other indexes and rankings, which take states – that is, sovereign territorial entities – somewhat too seriously. In today's globalized world, the legal status of millions of nationals extends their opportunities and aspirations far beyond their countries of origin: the confines of the state simply are not the limit of one's ambitions and expectations.

The reality that the QNI describes is regrettable in many respects: in most cases our nationality plays an important role in establishing a highly arbitrary ceiling, one that determines our opportunities and aspirations. This ceiling reflects the core aspect of being a national of some specific place: nationality is based on a random act of birth that bears no correlation to any person's achievements, ideas, feelings, and desires – instead, it is the result of a 'birthright lottery', in the memorable phrase of Ayelet Shachar. This is something that the designers of the QNI do not endorse but nevertheless observe as part of the day-to-day global reality and that the Index aims to document.

The Creators, Editors, and Authors of the QNI

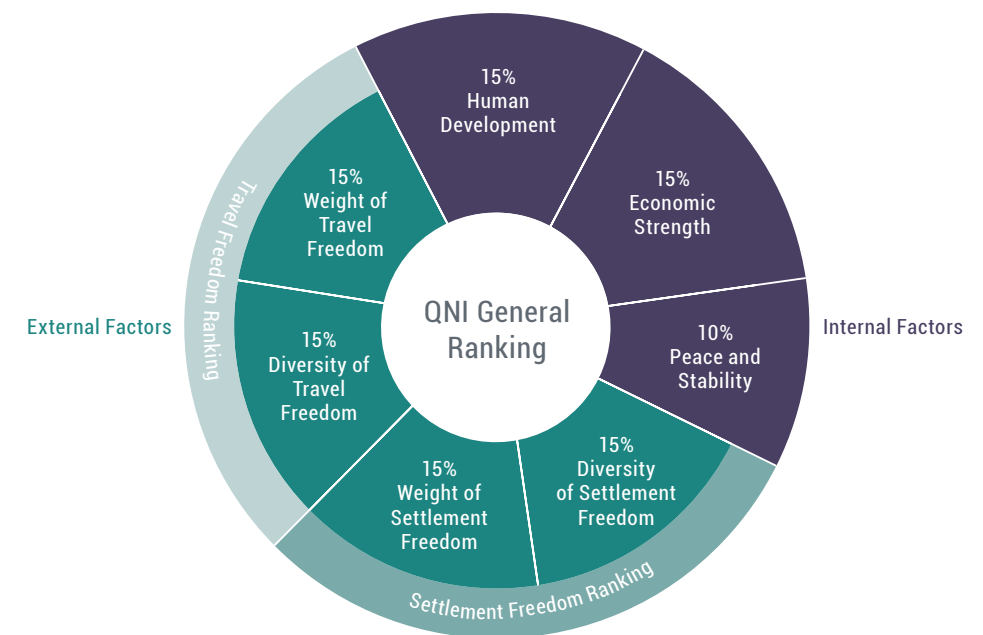

Published by Hart, the QNI is the result of successful cooperation between Dr. Christian H. Kaelin, Chairman of Henley & Partners, the world's leading residence and citizenship planning firm, and Prof. Dr. Dimitry Kochenov, Professor of European Constitutional Law and Citizenship at the University of Groningen.

Moving beyond the general concept, Mr. Justin Lindeboom, who writes and teaches European law and legal theory at the University of Groningen, has been the key editor of the Index together with Prof. Kochenov.

The Index is complemented by astute scholarly insight in the form of 20 expert commentaries written by 21 professionals and leading academics from across the globe, from Iceland to New Zealand. The publication is invaluable to academics and those interested in objectively comparing nationalities for any reason, including acquiring alternative residence or citizenship.

The production of the QNI has been made possible by the generous support of Henley & Partners – the global leader in residence and citizenship planning. With offices in over 30 countries worldwide, Henley & Partners is the world's largest and most important investment migration firm.

How Does the QNI Work?

For the reliable comparison of nationalities, it is important to consider both internal and external factors. Internally, the QNI looks at how successful nationalities are in terms of:

- Economic Strength: measured using purchasing power parity data, excluding natural resources rents, collected from the World Bank
- Human Development: measured using the United Nations Development Programme Human Development Index
- Peace and Stability: measured using figures from the Institute for Economics and Peace's annual Global Peace Index

Externally, the QNI evaluates the worth of nationalities in terms of:

- Travel Freedom:
 1. Diversity of travel freedom: measured by the number of other jurisdictions one can travel to while holding a particular nationality
 2. Weight of travel freedom: the combined human development level and economic strength of each of these jurisdictions
- Settlement Freedom:
 1. Diversity of settlement freedom: measured by the number of other jurisdictions one can settle in while holding a particular nationality
 2. Weight of settlement freedom: the combined human development level and economic strength of each of these jurisdictions

The QNI ranks nationalities on a scale from 0% to 100%, with scores rounded to one decimal place. The weighting of internal and external factors within the QNI General Ranking is 40% and 60% respectively. The Index allows for an objective and impartial comparative assessment of the worth of all the world's nationalities.

The General QNI Ranking

Nationality	Value 2018	Change in Value 2017–2018	Change in Value 2014–2018
1 France	83.5	-0.3	+0.2

Kälin and Kochenov's Quality of Nationality Index (QNI) ranks the objective value of all nationalities as legal statuses of attachment to states. Using a wide variety of strictly quantifiable data to gauge the opportunities presented and limitations imposed by nationalities on their holders, the QNI provides a comprehensive ranking of the intrinsic quality of each citizenship status of the world. Both the internal value (economic opportunities, human development, and peace and stability) and the external value (including the number and quality of visa-free travel and, crucially, settlement destinations) of all the nationalities of the world are measured, only to reveal the reality that the quality of nationalities is not correlated with the prestige of the issuing states.

Beautifully produced, richly illustrated, and accompanied by insightful expert commentary, the QNI is the seminal reference for citizenship aficionados. It is also an invaluable tool to illustrate the huge discrepancies in the value of the nationalities of the world: showcasing first hand the unequal distribution of rights and opportunities that different nationalities bring to their holders.

The QNI is sponsored by Henley & Partners – the Global Leader in Residence and Citizenship Planning.
